THE HISTORY OF NORDPEIS AND OF HEATING

The fireplace has always held a special place in the hearts and homes of Norwegians. Norway is famous for its cold winters and long nights, heavy snowfall and icy winds. Fire has always been essential here, more so than just about anywhere else in the world. The fire is the heart of the home, a badly needed source of heat, light and security. The heat from the fire has played a vital role throughout history, ensuring our survival.

STRONG ROOTS IN A MODERN COUNTRY

Nowadays, Norway is a modern, high-tech country, and the cold is a blessing – for anyone who wants to keep themselves warm, that is. Norwegians certainly do, and despite all the new technology that

is available, nothing has been able to replace the warm atmosphere that a crackling fire can provide in our houses and cabins. Norwegians have always had strong roots and a history of reliance on fire, and this is still the case today. Even now, Norway has more fireplaces per household than anywhere else in the world.

CREATED FROM NORWEGIAN HISTORY

Nordpeis was established almost 30 years ago, and we have been pouring Norwegian history and old traditions into our fireplaces ever since. Draped in quality, and incorporating modern technology and design, this has been our recipe for success. Quality was our promise then, and quality is our promise today. Our fireplaces combine old traditions with

modern functionality. The fire still gives the same feeling, but our products satisfy even the most stringent demands for clean combustion. This all leads to the Norwegian experience, incorporating enjoyment, good heating and a clear conscience.

MORE THAN HEAT

The status of the fireplace has changed over time. It is no longer just a source of heat, but rather a central part of our homes. Our fireplaces have been designed with clean lines, focusing attention on the flames. With our wide product range and the potential to adapt to meet personal tastes, there is something here for everyone. The result – timeless classics that form a natural meeting point in modern homes.

DENVER

H 1476 / W 1347 / D 981 mm

Fresh air supply: Yes
Length of logs (cm): 40
Nominal output (kW): 7

ACCESSORIES
Fresh air supply
Floorplate in clear glass
Ash solution

A classic fireplace with its low burning chamber, making it perfect for any living room. The large angular glass gives a beautiful view of the flames from various angles.

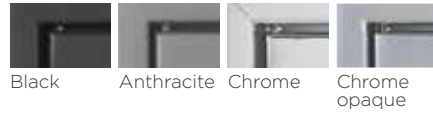

The rounded bench is in Colorado Anthracite, giving a soft and warm touch, and Denver has a generous log storage unit next to the insert.

Denver can be mirrored, placing the insert to the right or left.

LISBOA

H 1629 / W 417 / D 450 mm

Fresh air supply: Yes
Length of logs (cm): 30
Nominal output (kW): 4

ACCESSORIES
Fresh air supply
Floorplate in clear glass
Ash solution
Power Stone - heatstoring

Nordpeis designed Lisboa with three ideas in mind: great flame visibility, easy to place and uncomplicated design.

The insert is placed high up and with its three glass windows, the flames can be clearly seen from every direction, giving this relatively small fireplace a large clearly visible flame picture.

With its narrow depth and width it occupies little space and can be placed against most straight walls. It can be top or rear connected to the chimney.

For inspirational picture see page 12.

OSAKA

H 1720 / W 736 / D 403 mm

Fresh air supply: Yes
Length of logs (cm): 40
Nominal output (kW): 7

ACCESSORIES

Fresh air supply
Floorplate in clear glass
Marble fronts (Carrara, sandblasted Ruivina)
Ceramic fronts (Rusty Brown, Diamond Black, Diamond Silver)

The idea behind Osaka was to create a slender fireplace with a simple design. This was to leave the insert and the flame picture in focus. Osaka can be installed in its simplicity, or with any of decorative fronts in ceramic and stone, which gives the design an exclusive touch.

Osaka is a simple and modern fireplace with emphasis on quality materials and nice surfaces.

It can be placed directly against a combustible wall.

PANAMA L

H 1513 / W 940 / D 530 mm

Insert: Q-23FL / Q-34AL
 Fresh air supply: Yes
 Length of logs (cm): 50
 Nominal output (kW): 6 / 7

ACCESSORIES
 Fresh air supply
 Floorplate in clear glass
 Bench with top plate
 Powerstone - heat accumulating block

Nordpeis is happy to introduce its newest member to the successful Panama concept. This is a Low version, with the air outlet integrated in the top section. It can be combined with the corner bench, that exists with Carrara marble or Colorado Anthracite top plates. As with the other Panama models, the inserts are equipped with a lift door.

SALZBURG C

H 1770 / W 800 / D 550 mm

Fresh air supply: Yes
 Length of logs (cm): 40
 Nominal output (kW): *
 Weight (kg): 610*

ACCESSORIES
 Floorplate in clear glass
 Ceramic fronts (Diamond Black, Rusty Brown, Diamond Silver)

This is the fourth member of the Salzburg heat accumulating series from Nordpeis, and the first model with an angular insert. Salzburg C is optimal when you want to see the flames from various angles.

It can be placed free standing, in a corner or against a straight wall. There is the option of various ceramic fronts to decorate Salzburg C and give it a more personal expression.

For inspirational picture see page 18.

For more information about our Salzburg heataccumulating family, please see the separate Salzburg catalogue or visit our webpage: www.nordpeis.de

TAIPEI

H 1640 / W 443 / D 455 mm

Fresh air supply: Yes
Length of logs (cm): 40
Nominal output (kW): 4

ACCESSORIES
Fresh air supply
Floorplate in clear glass
Marble fronts (Carrara, sandblasted Ruivina)
Ceramic fronts (Rusty Brown, Diamond Black, Diamond Silver)

Nordpeis is very proud to present Taipei in 2015, a completely new model, challenging traditional notions of what is a fireplace or a stove, with its narrow diameter, making it easy to place anywhere in the home.

Taipei is tall and slender, with an elegant curved back. The unique burning chamber is vertical and the logs are placed standing up. There are 5 different exclusive fronts in ceramics and marble, to give that personal expression, fitting into any home.

 Nominal output (kW): 7
 Efficiency (%): 81
 Particules CO @ 13% O₂: 0,08
 Smoke outlet temperature °C: 243

ACCESSORIES
 Fresh air supply

This little insert in widescreen format is pretty much the most innovative product Nordpeis has developed. It could even be the slimmest insert for wood burning on the market.

The logs are placed lower in the combustion chamber which increases the combustion temperature and thus ensures the clean combustion at a low nominal output.

For inspirational picture see page 22.

TECHNICAL INFORMATION

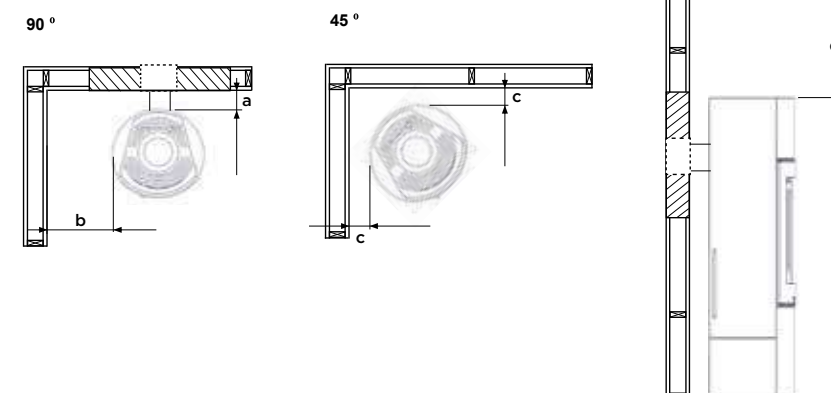

For up to date information please see the installation manual - www.nordpeis.com

Always use the instruction manual when you install a Nordpeis product.
